

## CC – Your Partner for Your IT-Future

Top quality software engineering and uncompromising customer orientation in software consulting and development were the driving forces behind the founding of Case Consult in 1988. Today CC, headquartered in Wiesbaden, Germany is an international specialist in software evolution enabling, Open Source technology, products and support, and a leader in innovative quality assurance tools. The CC Group is international scope with over 200 employees in Wiesbaden (Germany), Boston (USA), and Thiruvananthapuram (India).

As an independent software development and consulting company, CC has the knowledge and experience to support its clients in the planning and realization of strategic Open Source projects, applications and total solutions.

CC already has extensive Open Source expertise, experience and capabilities and we stand ready to assist our clients' implement effective Open Source IT solutions. CC has put together innovative and effective **Professional Open Source System Services (PrOSSyS)** which offer the guarantee of appropriate, reliable and dependable applications that work for you.

### **Our Strategy: Software Evolution En@bling**

Today, more than ever, we are aware to the speed at which technological changes take place. Fortunately, or unfortunately, business methodologies and processes aren't changing at quite the same pace. Users are often faced with situations where software systems are no longer compatible with state-of-the-art technology. It is our role to facilitate the on-going evolution of such software systems. We help to combine the old with the new, making sure that acquired business logic and functionality do not get lost along the way.

The unique advantage of **SEE** lies in using and extending the life of existing systems, which is cost- and time-effective, and modernizing and optimizing them as quickly, efficiently and effectively as possible. This way we equip our clients with the best from the past and the present, and enable them to gain a competitive edge for tomorrow's world. **SEE** opens the door to future IT, with the added benefit of reduced costs and increasing savings along the way.

## **Our Services**

### **I. Professional Services**

Our professional services support our clients in the planning and realization of effective software solutions. As such we offer a complete range of services including strategical consulting, system analysis, software design, programming, implementation and training.
